PHASE I ENVIRONMENTAL SITE ASSESSMENT

For:

**Mr. E. Dana Smith, Acting Director
Greater Lafayette Community Development Corporation
337 Columbia Street
Lafayette, Indiana 47901**

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) for the Tire Specialty Safety Center/BF Goodrich Automotive facility located at 711 Widewater Drive in Lafayette, Indiana (herein referred to as the Property) was conducted in general accordance with American Society for Testing and Materials (ASTM) E1527-05 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (referred to as E1527). This inspection included project site boundaries, interior inspection of the on-site structures, other open areas and a reconnaissance of surrounding properties.

The following is a brief summary of our report. Please refer to the full text of this report in its entirety for a comprehensive understanding of the information presented in this Executive Summary, as specifics are not fully discussed in this section. Based upon the agreed scope of work, this ESA did not reveal evidence of recognized environmental conditions (RECs) in connection with the Property with the exception of the following items.

- IWM Consulting considers the off-site property to the northeast (Former Mechanic's Laundry, VRP No. 6980705) as a potential REC. In fact, two flush-mounted monitoring wells in conjunction with the Former Mechanic's Laundry facility are located in northeast area of the asphalt parking lot at the Property. It appears that dissolved volatile organic compound (VOC) concentrations have been detected in the groundwater from one of the two monitoring wells. Additionally, two soil borings advanced in proximity to the monitoring wells appear to also have dissolved VOC concentrations in groundwater. If necessary, a comprehensive Phase II Subsurface Investigation would need to be conducted to determine if the Property has been further impacted by past off-site operating activities. The subsurface investigation should consider analyzing soil and groundwater samples for total VOCs using appropriate laboratory methods.

The item listed below is not necessarily considered an REC; however, IWM Consulting is providing additional recommendations to address possible concerns with the Property.

- Appropriate spill prevention and countermeasure controls should be implemented to prevent or control potential leaks or spills. Consequently, secondary containment is recommended for all ASTs, 55-gallon drums and other containers utilized to hold motor oil, used oil or other possible spent products.
- If future construction or redevelopment activities at the Property encounter environmental impairment in the subsurface soil or groundwater, then an additional environmental investigation may need to be conducted.

It is the opinion of IWM Consulting's Environmental Professional that this environmental site assessment has identified conditions indicative of releases or threatened releases of hazardous substances at the Property from possible off-site sources and further investigation may be warranted.

1.0 INTRODUCTION

This Phase I Environmental Site Assessment (ESA) was prepared for Mr. E. Dana Smith of the Greater Lafayette Community Development Corporation (Client) at the Property located at 711 Widewater Drive in Lafayette, Indiana (the Property). Our services were conducted in general accordance with the American Society for Testing and Materials (ASTM) E 1527-05 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (referred to as E1527).

1.1 Purpose

The purpose of this ESA was to determine the existence of “Recognized Environmental Conditions” (RECs) in connection with the Properties using an approach generally conforming to ASTM E1527-05. RECs are defined in E1527-05 as the “presence or likely presence of any hazardous substances or petroleum products on a Property under conditions that indicate an existing release, a past release, or material threat of a release of any hazardous substances or petroleum products into the structures on the Property or into the ground, ground water, or surface water of the Property.” RECs include hazardous substances or petroleum products even under conditions in compliance with laws but do not include “*de minimis*” conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” Conditions determined to be *de minimis* are not RECs.

1.2 Scope of Services

The Scope of Services generally includes a review of historical records and regulatory database information, a reconnaissance of the Property and adjoining properties, interviews (historical and with those currently familiar with the Property, where available), and preparation of a report.

Records are reviewed given that these are “reasonably ascertainable.” ASTM 1527-05 defines “reasonably ascertainable” as “information that is publicly available, obtainable from its source within reasonable time and cost restraints, and is practically reviewable.” The document examination may include the following tasks (refer to the agreed-upon scope of work):

- Review of aerial photographs, City Directories and Fire Insurance Maps of the Property and adjoining properties. If these are not available, the Report will include a statement regarding the lack of availability.
- Review of chain-of-title records provided by the Client, unless otherwise agreed.
- Review of regulatory database provider report of federal, state, and local listings for the Property and other properties/facilities found within the search radii specified by ASTM, including the National Priority List, the Federal CERCLIS list, state hazardous waste priority facilities, RCRA Hazardous Waste Activity Notifiers and registered/leaking underground storage tank records.

The Reconnaissance typically includes the following tasks:

- Visual observations of the Property and exteriors of buildings thereon to identify indications of RECs, such as above ground and underground storage tanks, stained soil or floor areas, vegetative stress, filled areas, waste or material dumping. Interviews with the current owner and/or key Property manager or other person as designated by the owner regarding the Property’s current and past uses and information of environmental significance.

- Inquiries to appropriate local government offices, such as the Fire Department.
- Review of available documentation on electrical transformers at the Property, if applicable (e.g., ownership and PCB content).
- Observations of adjoining properties (from Property boundaries and public rights-of-way).
- Photographic documentation of the Property.
- Preparation of a Property diagram.

1.3 Standard of Care and Reliance

These Phase I ESA services were performed in a manner consistent with industry practices. No warranties, express or implied, are intended or made. Unless otherwise agreed, this ESA was prepared for the exclusive use and reliance of the client identified by the cover page of this final report (the Client). Any use of this Phase I ESA or the information contained herein by persons or entities other than the Client (without the express written consent of the Client and IWM Consulting) will be at the sole risk and liability of the Client. Third party reliance may be available (if no potential conflict of interest is apparent) using a reliance document that is subject to the terms of the proposal for these services and IWM Consulting's standard terms and conditions. The liability limit listed in IWM Consulting's terms and conditions is IWM Consulting's aggregate liability to the Client and all relying parties.

1.4 Limitations and E1527 Exceptions of the Assessment

Findings, Conclusions and Recommendations referenced herein are based upon and limited to those observations made during the listed Reconnaissance date.

Phase I ESAs are limited to specific inquiries and are based upon records, reviews and opinions rather than invasive testing services. Therefore, IWM Consulting cannot eliminate uncertainty as to environmental conditions at the Property. Nor can we represent that the Property contains no hazardous, petroleum or other products or substances (or other latent conditions) beyond those identified or observed from this scope of work. Information in this report is based upon the Property's current use(s) and information obtained prior to issuance of the final report. IWM Consulting does not warrant the accuracy of information obtained from interviewees or other third party sources of information (such as other environmental firms, database companies or title companies).

This ESA does not include the following: ASTM E-1527-05 Non-Scope Considerations (such as asbestos containing materials, radon, wetlands, lead, regulatory compliance, ecological issues, indoor air quality/fungi, high voltage power lines), detailed review of governmental agency records, review of information or records not received within two (2) days of the final report date, business environmental risk evaluations, or other services not discussed in this report. Further, this report does not include a detailed discussion of the Property's geology or hydrogeology, review of insurance coverage or claims history of the Property, review of the "toxic tort" or environmental litigation history of the Property, survey of naturally occurring or biologically toxic materials, such as poisonous plants or insects, descriptions of unforeseen releases of the Property that may occur subsequent to the Reconnaissance, the dismantling, probing, or disassembly of building materials or systems or observing inaccessible interior or exterior areas, consideration of compliance with various environmental laws or municipal ordinances (other than those conditions immediately and visually apparent during the Reconnaissance, listed on a regulatory database or revealed during interviews), collection and analysis of groundwater, surface water, air, biological, or other samples, or a Property title search or review (unless provided by the Client or otherwise agreed with the Client).

Please note that no Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the Property. Referring to the procedures in E1527 will reduce, but not eliminate, these uncertainties. It is possible, therefore, that all RECs or relevant environmental issues may not have been identified. The failure to discover these, using a reasonable and mutually agreed upon scope of services, does not guarantee the absence of such RECs or issues, but only that they were not found as a result of this assessment. The services herein are in no way to be construed or relied upon as a legal interpretation, opinion or advice.

2.0 PROPERTY DESCRIPTION

The Property is located on the Northwest Quarter of Section 16, Township 23 North, and Range 4 West within the United States Geological Survey (USGS) Lafayette West Quadrangle in Fairfield Township, Lafayette, Tippecanoe County, Indiana. The Parcel Identification Number for the Property is as follows: 158-17200-0360. A brief Legal Description for the parcel is as follows:

Parcel Description:

A Part of School Lot #8 in part of the Northwest Quarter of Sec 16, Twp 23 North, R 4 West; Fairfield Township, Tippecanoe County, Indiana. Welborn IND PK PT 1 Lot 7.

The Tire Specialty Safety Center/BF Goodrich Automotive facility conducts general repair and tire service for automobiles and is listed as Lot 7 within the Widewater Industrial Park formerly named the Welborn Industrial Park. The business has been located at this address for approximately 17 years, prior to that time period the Property was a vacant lot. The Property consists of one-story steel building on a concrete slab that was constructed during the time period of the late 1980's to early 1990's. The frontage of the building and a concrete and asphalt paved parking lot is located on the north side of the Property. The concrete and asphalt paved parking lot extends along the majority of the east side of the building. A maintained grass lawn is located on the south side of the Property and along the west side of the building. No surface staining or stressed vegetation was noted at the exterior areas of the Property.

The building is divided into four main sections. The northeast section consists of one reception area and one office; the east-central section consists of five continuous garage work bays and one parts storage room and oil room; the southeast section is a private storage garage for restored or new vehicles; and the west section is used as a storage garage for restored vehicles (1 boat, 1 automobile and 2 tractors) and approximately 200 obsolete tires.

East-Central Section:

Four aboveground lifts are located within the garage bay work area. Directly west of the garage work bay area is an adjacent oil room and one parts storage room. The oil room consisted of three 55-gallon drums containing either 5-20 or 10-30 motor oil; two 55-gallon drums of grease; one 225-gallon metal tote of used oil; one 250-gallon AST of motor oil and one 10-gallon parts washer. The 10-gallon parts washer uses petroleum based cleaner; therefore, fluids generated by the parts washer is removed by the owner/operator and placed into the used oil metal tote as needed. The used oil is reportedly removed by a private contractor for heating purposes. The parts storage room contains several metal racks containing approximately 50 quarts of automotive oil, lubricants and cleaners and miscellaneous automotive parts. No surface staining was evident on the garage / work floor area during the site inspection.

A metal drain is located on the east side of the building and directly adjacent to the garage work bays. Reportedly, the drain empties into a two-stage concrete oil/water separator tank which is located south of the building. The water from the two-stage tank empties into the sanitary sewer system; however, sediments and condition of the tank are checked by the City of Lafayette on a quarterly basis.

Two flush-mounted monitoring wells are located in the northeast boundary of the asphalt paved parking lot of the Property. The monitoring well is part of the well network associated with the former Mechanic's Laundry and Supply, Inc. facility which is approximately 1,000 feet northeast of this location.

The general location of the Property (topographic map) and site map are depicted in Appendices A and B, respectively. Photographs of the Property taken during the Property reconnaissance are presented in Appendix C of this ESA.

3.0 USER-PROVIDED INFORMATION

The Property owner provided IWM Consulting with a *Widewater Industrial Park Location and Information Sheet, Preliminary Plat of the Welborn Industrial Park* dated December 22, 1980, and a current *Widewater Industrial Park Plat Map*. Copies of the available portions of the documents provided are included in Appendix D.

3.1 Title Records

Available chain-of-title records/prior ownership records for the Property were obtained from the Fairfield Township Assessor's office and the Tippecanoe County Auditor's Office and reviewed by IWM Consulting. Discussion of the available records is provided in the Historical Information Review section.

3.2 Environmental Liens or Activity and Use Limitations

No information was made available to IWM Consulting regarding environmental liens, or activity or use limitations for the Property, and none were discovered during this ESA.

3.3 Specialized Knowledge

The site representative informed IWM Consulting that she has limited specialized knowledge or experience material to identifying RECs related to the Property. The specialized information was obtained by the Client after reviewing an Initial Review Report prepared for the subject area on April 20, 2007. The information is summarized in the Client completed ASTM E1527-05 User Questionnaire. A copy of the completed questionnaire is provided in Appendix D.

3.4 Valuation Reduction for Environmental Issues

The Client informed IWM Consulting that they have no knowledge of conditions that would cause the purchase price of the Property to be significantly less than the purchase price of comparable properties.

3.5 Owner, Property Manager, and Occupant Information

The Client did not provide information other than information discussed elsewhere in this report.

3.6 Reason for Performing Phase I ESA

As agreed with the Client, this ESA has been performed to satisfy due diligence requirements for the potential future purchase and redevelopment of the Property and to determine if there are RECs in connection with the Property as of the date of the Reconnaissance and this report. The project is part of an area-wide redevelopment initiative by the Greater Lafayette Community Development Corporation and this Phase I ESA is funded by an Environmental Protection Agency (EPA) *Community-Wide Brownfield Assessment Grant*.

3.7 Other

The Client indicated he had no other relevant knowledge regarding or affecting RECs at the Property. IWM Consulting personnel requested that the Client review and answer the ASTM E1527-05 User Questionnaire. A copy of the completed questionnaire is provided in Appendix D.

4.0 RECORDS REVIEW

This section presents a summary of the regulatory database review derived from the results of an Environmental Data Resources® Report (EDR) database search for the Property and facilities within search radii, as per ASTM guidelines. Public records pertaining to the Property were also reviewed from the Indiana Department of Environmental Management (IDEM) file room. The database report and IDEM records are provided in Appendix E. Identification or confirmation of database listings shown as “unmappable” was out-of-scope. IWM Consulting also made reasonable attempts to interview (or request information) personnel from the City of Lafayette Fire Department and Tippecanoe County Department of Health having jurisdiction over the Property. IWM Consulting was able to contact local governmental personnel as part of the Phase I ESA activities. Local government inquiries are presented in Section 4.3. When referring to “up-gradient, cross or side-gradient and down-gradient,” this usage refers only to the topographic gradient that often mirrors actual groundwater gradient (actual ground water gradient, depth and flow directions cannot be confirmed without information obtained from monitoring wells installed on-site and/or nearby).

4.1 Federal Database Review

FEDERAL DATABASES	Property Listed (Y/N)	Other Facilities Listed (0/#)
Federal Database Title and ASTM Radius		
Federal National Priorities List (NPL)	N	1
Radius – 1 mile		
Federal Delisted NPL Site List	N	0
Radius – $\frac{1}{2}$ mile

Federal Institutional Control/Engineering Control Registries	N	0
Radius – Property only		

Tippecanoe Sanitary Landfill, Inc. – CERCLIS/NPL Facility

2801 N. 9th Street

Approximately 0.75 miles northeast and topographically upgradient of the Property
This site is currently on the Final NPL.

Old Monon Rail Rebuilding Shop – CERCLIS Facility

1750 Monon Ave

Approximately 0.75 miles east/southeast and topographically upgradient of the Property
On March 20, 1991 a release of 180,000 gallons of liquid nitrogen occurred at the site from a valve rupture of an above ground storage tank.

Lafayette Instrument Co Inc - CERCLIS-NFRAP Facility

3700 N Sagamore Pkwy N

Approximately 0.75 miles northeast and topographically upgradient of the Property

One violation was discovered for this facility

Based on the distance and/or current status of the Federal site locations, IWM Consulting does not regard these site locations as RECs in relation to the Property.

4.2 State & Tribal Database Review

STATE & TRIBAL DATABASES		Property Listed (Y/N)	Other Facilities Listed (0#)
State & Tribal Database Title and ASTM Radius	N	0	
State & Tribal Hazardous Waste Facilities (SHWF)			
Radius – 1 mile	N	0	
State & Tribal Equivalent NPL			
Radius – 1 mile	N	0	
State & Tribal Equivalent CERCLIS			
Radius – $\frac{1}{2}$ mile	N	1	
State & Tribal Landfills and/or Solid Waste Disposal Facilities			
Radius – $\frac{1}{2}$ mile	N	4	
State & Tribal Leaking Underground Storage Tank (LUST)			
Radius – $\frac{1}{2}$ mile	N	0	
State & Tribal Registered Underground Storage Tank (UST)			
Radius – Property and Adjoining properties	N	0	
State & Tribal Institutional Control/Engineering Control Registries			
Radius – Property only	N	0	
State & Tribal Voluntary Cleanup Sites (VCP)			
Radius – $\frac{1}{2}$ mile	N	2	
State & Tribal Brownfield Sites			
Radius – $\frac{1}{2}$ mile	N	0	
State & Tribal Spills			
Radius – Property location	N	0	

Mechanic's Laundry & Supply Inc – Voluntary Cleanup Site

810 Widewater Drive / 2438 N. 9th Street

Approximately 1,000 feet to the northeast and topographically cross-gradient of the Property

VRP#: 6980705 and UST FID#: 4381.

It appears that two 1,000-gallon gasoline USTs, one 1,000-gallon Stoddard solvent UST, three 500-gallon Stoddard solvent USTs and two additional USTs (unknown contents and capacities) were removed between 1989 and December 1991. The facility is currently in the IDEM Voluntary Remediation Program and a monitoring well network has been placed on-site and off-site throughout the Widewater Industrial Park area. It is unknown if the (VOC) plume in soil and groundwater has been adequately characterized. A copy of the most recent VOC plume map is provided in Appendix E.

Tippecanoe Sanitary Landfill, Inc. – Landfill Facility

2801 N. 9th Street

Approximately 0.75 miles northeast and topographically upgradient of the Property

This site is currently on the Final NPL.

Siemens Power Transmission / Landis & Gyr – Voluntary Cleanup Site

3601 Sagamore Pkwy N

Approximately 0.75 miles northwest and topographically cross-gradient of the Property
This facility was assigned a medium corrective action priority. VRP: 6981103

Shaffer Trucking Inc – Registered LUST Facility

2009 N. 9th St

Approximately 0.25-0.50 miles south/southwest and topographically cross-gradient of the Property
Facility ID: 4283 and Incident No. 199201540

The facility was considered a low priority (i.e. soil only) and given a “Discontinued” status from IDEM.
Phillips 66 – Registered LUST Facility
2680 US 43 S
Approximately 0.50 miles northwest and topographically cross-gradient of the Property
Facility ID: 11517 and Incident No. 199110552
This facility is considered a high priority by IDEM.

M & M Budget Motor – Registered LUST Facility

1601 Canal Rd

Approximately 0.75 miles southwest and topographically cross-gradient of the Property
Facility ID: 16930 and Incident No. 199002553
This facility is considered a high priority by IDEM.

Goris Property – Registered LUST Facility

Canal/Greenbush Rd

Approximately 1 mile south/southwest and topographically cross-gradient of the Property
Facility ID: 20025 and Incident No. 199107088
This facility is considered a medium priority by IDEM.

Based on the distance and/or current status of the above site locations, IWM Consulting does not regard these site locations as RECs in relation to the Property with the exception of the former Mechanic’s Laundry and Supply, Inc. facility.

4.3 Local Government Inquiries

IWM Consulting contacted the Lafayette Fire Department regarding known adverse environmental conditions at the project site. According to Ms. Samantha Taylor, Lafayette Fire Department (LFD), no known adverse environmental conditions have been reported at the Property.

The Tippecanoe County Department of Health (TCDH) was interviewed regarding information relevant to the environmental condition of the Property. According to Mr. Ron R. Noles, Environmental Health Specialist of the TCDH, no known adverse environmental conditions have been reported.

A copy of the Communication Logs from the LFD and TCDH is contained in Appendix F.

5.0 PHYSICAL SETTING INFORMATION REVIEW

The following section presents information as to the Property's physical setting. Note the terms "up-gradient, cross or side-gradient and down-gradient" may be used in this report and refer to the topographic gradient as related to the Property that often mirrors actual groundwater gradient. Note, however, that groundwater flow direction and the depth to any shallow groundwater likely vary based upon seasonal changes (i.e., precipitation amounts) and the depth to the soil/bedrock interface. Actual ground water gradient, depth and flow directions cannot be confirmed without information obtained from ground water monitoring wells installed on the Property and/or nearby.

5.1 Topographic Map Information

The Property is located on the Northwest Quarter of Section 16, Township 23 North, and Range 4 West within the Lafayette West Quadrangle 7.5 minute series topographic map prepared by the United States Geological Survey. The elevation of the Property is approximately 520-550 feet National Geodetic Vertical Datum of 1929. The Property and the surrounding area consist primarily of a flat to gently sloping topography. A topographic map is included in Appendix A.

5.2 Flood Zone

A review of the Federal Emergency Management Agency Flood Insurance Rate Map, Community Panel Number 180253 0001 B (Panel 1 of 5), and effective date November 19, 1980 revealed that the Property is located primarily within Zone C. Zone C is considered areas of minimal flooding. The adjacent properties are also listed within Zone C to the north, east and south. The areas to the west are located in either Zone A8 or Zone B. Zone A8 is listed as areas within the 100-year flood plain. Base elevations and flood hazard factors are determined. Zone B is listed as areas that are between the 100-year and 500-year flood plains.

5.3 Wellhead Protection Zones

IWM Consulting contacted the Indiana Department of Environmental Management Groundwater Section to determine if the Property is located within a wellhead protection zone area (WHPA). Based on the information provided, the Property is located within the established WHPA. A copy of the available wellhead protection map for the area is no longer available to the general public; however, a WHPA determination letter is provided in Appendix F.

6.0 HISTORICAL INFORMATION REVIEW

This section presents historical information that is both reasonably ascertainable and readily available as per ASTM guidelines in order to reveal the Property's obvious usage from 1940 or its first developed use, whichever is earlier (unless otherwise stated in Section 1.0 above, Limitations & Exceptions). Historical records review for non-adjacent properties was out-of-scope.

6.1 Property Ownership

Property ownership history records were obtained through the Fairfield Township Assessors Office and the Tippecanoe County Auditors Office for the parcel. Of the previous owners, none appear to suggest uses indicative of RECs. A table summarizing the Property Owner History for each parcel is provided in Appendix G.

6.2 Aerial Photographs

Aerial photographs depicting the Property area were obtained from the Indiana State Archives (1939, 1957, 1963, and 1971), Indiana Department of Transportation (1976 and 1989), TerraServer USA® (1993, 1999, and 2003) and Google Earth® (2005). The following reasonably available aerial photographs were reviewed as described below (from oldest to most recent). Note that the scale and clarity of aerial photographs necessarily affect and limit evaluation of features and conditions that may be depicted on a particular aerial photograph. A copy of the most recent aerial photograph from 2005 is presented in Appendix H of this ESA.

AERIAL PHOTOGRAPH REVIEW		
Year	Property Description	Surrounding Properties Description
1939 4-13-39 BFV-7-75	The Property is part of a large agricultural field.	It appears that a small farmstead (3 buildings) may occupy an area near the site to the west. A larger barn structure is northwest of the site. The remainder of the surrounding area is part of a large agricultural field.
1957 9-29-57 BFV-5T-90	The Property appears similar to the 1939 aerial photograph.	Further northwest is one square building (614 Widewater Dr.) and a residence (610 Widewater Dr). The square building appears to be a possible hanger. A dirt drive is north of the site and extends east to west. A private landing strip is further west of the square buildings and residence. Approximately one-eighth mile northeast of the Property is a large commercial building (Mechanic's Laundry). Excavation or quarry activities appear to be occurring in the current vacant lot area to the south of the Property (Lot 11). A residence within an area of trees is further east of the site.
1963 5-18-63 BFV-1DD-100	The Property appears to be a vacant lot and no longer used for agricultural purposes.	Three airplanes are stored near the square shaped buildings to the north and west. An additional building has been constructed further west (607/609 Widewater Dr.). The remaining adjacent properties appear similar to the 1957 photograph.
1971 6-17-71	The Property appears similar to the 1963 aerial photograph.	Additional construction appears to be occurring east and northeast of the Property. A golf course has been established approximately one eighth mile north/northwest of the site.

AERIAL PHOTOGRAPH REVIEW (Continued)

Year	Property Description	Surrounding Properties Description
1976 3-9-76 79 6 No. 118	The Property appears similar to the 1971 aerial photograph.	Several of the Widewater Industrial buildings have been constructed to the east and northeast; however, the 715, 721 and 801 Widewater buildings have not been constructed. The east gravel lot (Lot 10) appears to be used for truck/trailer storage. Lot 11 appears to be used for intermittent trailer storage.
1989 5-10-89 79 6 No. 111	The Property appears to be unchanged from the 1976 photograph.	The adjacent properties appear unchanged from the 1976 aerial photograph.
1993 4-10-93	The Property building has been constructed.	The building located between the 607/609 Widewater Drive address and the 703 Widewater address is no longer present. The other adjacent and near/adjacent property buildings have all been constructed.
1999 3-27-99	The site appears to be unchanged from the 1993 photograph.	The surrounding/adjacent properties appear unchanged from the 1993 photograph.
2003 7-1-03	The site appears to be unchanged from the 1999 photograph.	The surrounding/adjacent properties appear unchanged from the 1999 photograph.
2005 4-14-05	The site appears to be appears to have six trailers stored along the south side boundary of the site.	The surrounding/adjacent properties appear unchanged from the 2003 photograph.

Based on a review of the aerial photographs, the Property was part of an agricultural field until the 1960's at which time it became a vacant lot. The site building was constructed between 1989 and 1993. The surrounding areas became more developed in the 1970's. From the late 1980's - early 1990's to present time, the site has been used primarily as an automotive repair business. Based on review of the aerial photographs, there does not appear to be RECs located on the Property or the surrounding properties.

6.3 City Directories

City Directories were reviewed from the City of Lafayette Library and the Greater Lafayette City Development Corporation office for the Property address and adjacent properties. These City Directories were reviewed from Polk City Directories (1941-2006). The following City Directories were reasonably available and reviewed as described below (from oldest to most recent). Note that the Property address may or may not appear as a listing in directories reviewed. Copies of City Directories reviewed are not included with this report due to copyright restrictions.

2006	Same as above	

Based on a review of the City Directories, the Property appears to have unlisted until 1993 at which time it was

first listed as Tire Specialty Inc. The surrounding properties appear to have been specialty commercial businesses with no known environmental concerns.

6.4 Sanborn Fire Insurance Maps

It was determined that Sanborn Fire Insurance Maps depicting the Property were not available after IWM Consulting conducted a search at the Indiana Historical Society and a review of the Environmental Data Resources Inc. (EDR) Sanborn® Map Report (1885-1978).

7.0 RECONNAISANCE

This section presents information gathered during the Reconnaissance of the Property and adjoining properties. This noninvasive Reconnaissance was conducted to observe accessible and representative portions of the Property for presence of RECs. The following indicators of RECs, as per ASTM guidelines, were the focus of this Reconnaissance: stained soils, stressed vegetation, transformers, evidence of above ground or underground storage tanks, trash and debris, use or storage of hazardous substances or petroleum products. IWM Consulting also interviewed (or made reasonable attempts to do so) the Property representative identified by the Client to gain more information about the Property uses and environmental issues, if known by the interviewee.

IWM Consulting representatives, Mr. Patrick E. Rohan, Project Manager and Mr. Donovan Wilczynski, Field Scientist conducted the Reconnaissance on September 21, 2007. IWM Consulting was accompanied by Mr. Stan Hylbert (Property Manager) during the majority of the site visit. The weather was warm and cloudy with a temperature of approximately 80 degrees Fahrenheit. Observations at the Property were not limited during the site reconnaissance.

7.1 General Property Setting

The Tire Specialty Safety Center/BF Goodrich Automotive facility conducts general repair and tire service for automobiles and is listed as Lot 7 within the Widewater Industrial Park formerly named the Welborn Industrial Park. The business has been located at this address for approximately 17 years, prior to that time period the Property was a vacant lot. The Property consists of one-story steel building on a concrete slab that was constructed during the time period of the late 1980's to early 1990's. The frontage of the building and a concrete and asphalt paved parking lot is located on the north side of the Property. The concrete and asphalt paved parking lot extends along the majority of the east side of the building. A maintained grass lawn is located on the south side of the Property and along the west side of the building. No surface staining or stressed vegetation was noted at the exterior areas of the Property.

The building is divided into four main sections. The northeast section consists of one reception area and one office; the east-central section consists of five continuous garage work bays and one parts storage room and oil room; the southeast section is a private storage garage and garage bay for restored or new vehicles; and the west section is used as a storage garage for restored vehicles (1 boat, 1 automobile and 2 tractors) and approximately 200 obsolete tires.

East-Central Section:

Four aboveground lifts are located within the garage bay work area. Directly west of the garage work bay area is an adjacent oil room and one parts storage room. The oil room consisted of three 55-gallon drums containing either 5-20 or 10-30 motor oil; two 55-gallon drums of grease; one 225-gallon metal tote of used oil; one 250-gallon AST of motor oil and one 10-gallon parts washer. The 10-gallon parts washer uses petroleum based cleaner; therefore, fluids generated by the parts washer is removed by the owner/operator and placed into the used oil metal tote as needed. The used oil is reportedly removed by a private contractor for heating purposes. The parts storage room contains several metal racks containing approximately 50 quarts of automotive oil, lubricants and cleaners and miscellaneous automotive parts. No surface staining was evident on the garage / work floor area during the site inspection.

A metal drain is located on the east side of the building and directly adjacent to the garage work bays. Reportedly, the drain empties into a two-stage concrete oil/water separator tank which is located south of the building. The water from the two-stage tank empties into the sanitary sewer system; however, sediments and condition of the tank are checked by the City of Lafayette on a quarterly basis. Two flush-mounted monitoring wells are located in the northeast boundary of the asphalt paved parking lot. The monitoring wells are part of the well network associated with the former Mechanic's Laundry facility which is approximately 1,000 feet northeast of this location.

The site is supplied with electrical service by Duke Energy, natural gas service by Vectren, and water and sanitary sewers by the City of Lafayette.

7.2 Reconnaissance Observations: Properties

Feature	SPECIFIC OBSERVATIONS DURING RECONNAISSANCE	
	Observed (Y/N)	Location
Source of Drinking Water	N	
Sewage Disposal/Septic	N	
Use or Storage of Hazardous Substances	N	
Use or Storage of Petroleum Products	Y	The business utilizes petroleum products as a normal part of operations.
Aboveground Storage Tanks	Y	One 225-gallon metal tote of used oil; one 250-gallon AST of motor oil and one 10-gallon parts washer is located in the oil room.
Underground Storage Tanks (or related equipment)	Y	A two-stage concrete oil/water separator is located south of the Property building.
Surficial Staining or Corrosion	N	
Stressed Vegetation	N	
Drums or Other Containers	Y	Three 55-gallon drums containing either 5-20 or 10-30 motor oil and two 55-gallon drums of grease are located in the oil room.
PCBs	N	
Drains and Sumps	Y	A metal drain is located on the east side of the building and directly adjacent to the garage work bays.
Pits, Ponds or Lagoons	N	
Solid Waste Disposal	N	
Wastewater Discharges	N	
Wells	Y	Two flush-mounted monitoring wells are located in the northeast boundary of the asphalt paved parking lot.

As indicated in the above table, there were six potential REC's identified during the Reconnaissance. The potential REC is listed below.

- 1) A two-stage concrete oil/water separator tank is located directly south of the Property building and empties into the sanitary sewer system. The sediments and condition of the tank are checked by the City of Lafayette on a quarterly basis. To date, no violations have been given by the City of Lafayette. IWM Consulting does not consider the two-stage oil/water separator as a REC at this time.
- 2) The business stores motor oil in 55-gallon drums and one 250-gallon AST; grease in 55-gallon drums; and contains a parts storage room with approximately 50 quarts of automotive oil, lubricants and cleaners. No surface staining was evident in the storage areas. IWM Consulting does not consider the petroleum products as a REC at this time.

3) One 225-gallon metal tote of used oil; one 250-gallon AST of motor oil and one 10-gallon parts washer is located in the oil room. No surface staining was evident in the oil room. IWM Consulting does not consider the ASTs or containers as a REC at this time.

4) Three 55-gallon drums containing either 5-20 or 10-30 motor oil and two 55-gallon drums of grease are located in the oil room. No surface staining was evident in the oil room. IWM Consulting does not consider the drums as a REC at this time.

5) A metal drain is located on the east side of the building and directly adjacent to the garage work bays. Reportedly, the drain empties into a two-stage concrete oil/water separator tank which is located south of the building. The water from the two-stage tank empties into the sanitary sewer system; however, sediments and condition of the tank are checked by the City of Lafayette on a quarterly basis. To date, no violations have been given by the City of Lafayette. IWM Consulting does not consider the metal drain as a REC at this time.

6) Two flush-mounted monitoring wells are located in the northeast boundary of the asphalt paved parking lot. According to records obtained from IDEM these wells were installed in order to investigate a historical release of VOCs at the Former Mechanic's Laundry facility (VRP Site No. 6980705) located approximately 1,000 feet northeast of the Property. IWM Consulting considers this to be a REC.

7.3 Reconnaissance: Adjoining Properties

Observations of adjoining properties from the Property's boundaries and public right-of-ways were made to identify possible RECs. The following types of properties surround the Property:

ADJOINING PROPERTY OBSERVATIONS		
Direction from Property	General Description	Features suggesting RECs (Y/N)
North	Widewater Drive is directly north of the Property. Further north is Holmestyle Electrical Contracting/Catering & Residence (706 Widewater Dr.) and Magic Glass Inc. (712 Widewater Dr.).	N
South	A large vacant maintained grass lot is directly south of the Property.	N
East	Advanced Puritan is east of the Property.	N
West	Pets Remembered Crematorium is located to the west of the Property.	N

No potential RECs were observed on the surrounding properties.

8.0 INTERVIEWS

Reasonable attempts were made to interview those with historical and current information concerning the Property's past and current uses and environmental issues or problems, if any. IWM Consulting was successful in interviewing the current Property owner; however, IWM Consulting was unable to interview the former Property owner at the time of this environmental site assessment.

- Interview with the current Property owner: IWM Consulting interviewed Mr. Bob Smith at the Property prior to initiating the site visit. According to Mr. Smith the building was built in the 1980's or 1990's. Prior to that time period, the Property was unused vacant land. He is not aware of USTs, chemical or petroleum spills or water wells at the Property. Additionally, he is not aware of any additional indicators that point to the presence or likely presence of contamination at the Property based on personal knowledge or experience.
- IWM Consulting also interviewed Mr. Stan Hylbert, the Property manager, at the Property prior to initiating the site visit. Mr. Hylbert concurred with Mr. Smith's evaluation of the Property. He is not aware of any additional indicators that point to the presence or likely presence of contamination at the Property based on personal knowledge or experience.
- Interview with the facility owner/operator: IWM Consulting interviewed Mr. John Mallady during the site inspection. According to Mr. Mallady, the facility has been in operation for approximately 15 years. The southeast portion of the building is a private garage used for storing vehicles. The west portion of the building is a storage garage for restored vehicles and obsolete tires that are no longer manufactured and sold. The site does not use USTs; however, ASTs are used in the oil room west of the garage work bays. No drains are located within the garage work bays; however, drains are located outside the building to the east. The drains empty into the City of Lafayette maintained concrete two-stage oil/water separator. The water is discharged to the sanitary sewer system. No sediment or sludges have been removed from the separator by the City of Lafayette to the best of his knowledge and no violations have been incurred from the City of Lafayette. The used oil generated from oil changes and the petroleum parts washer is stored in a 225-gallon metal aboveground tote. The used oil in the metal tote is removed on an as needed basis by a private contractor who re-uses the oil for heating other facilities/barns. The two wells located in his parking lot are associated with the former Mechanic's Laundry facility.
- The client or end user has completed an ASTM E1527-05 User Questionnaire relating to the site. A copy of the completed Questionnaire is located in Appendix D.

9.0 DATA GAPS

ASTM 1527-05 defines a “data gap” as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” IWM Consulting conducted this Phase I ESA for the Property and has identified the following “data gaps”:

- The historical use of the property could not be identified back to first developed use (i.e. 1939 aerial photograph-agricultural land).
- IWM Consulting was unable to contact the former property owners for the Property.
- There was no Sanborn Fire Insurance Map coverage for the Property.

It is the opinion of the Environmental Professional that the data gaps identified are not “significant data gaps” and do not hinder the ability of the Environmental Professional to develop definitive conclusions or recommendations regarding this Phase I ESA.

10.0 FINDINGS AND RECOMMENDATIONS

This Phase I Environmental Site Assessment was performed for the Property in conformance with the scope and limitations presented under Section 1.0 of this report.

IWM Consulting has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 for the Property (located at 711 Widewater Drive). Any exceptions to or deletions from, this practice are described in Section 9.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with this Property with the exception of the following items.

- IWM Consulting considers the off-site property to the northeast (Former Mechanic's Laundry, VRP No. 6980705) as a potential REC. In fact, two flush-mounted monitoring wells in conjunction with the Former Mechanic's Laundry facility are located in northeast area of the asphalt parking lot at the Property. It appears that dissolved volatile organic compound (VOC) concentrations have been detected in the groundwater from one of the two monitoring wells. Additionally, two soil borings advanced in proximity to the monitoring wells appear to also have dissolved VOC concentrations in groundwater. If necessary, a comprehensive Phase II Subsurface Investigation would need to be conducted to determine if the Property has been further impacted by past off-site operating activities. The subsurface investigation should consider analyzing soil and groundwater samples for total VOCs using appropriate laboratory methods.

The item listed below is not necessarily considered an REC; however, IWM Consulting is providing additional recommendations to address possible concerns with the Property.

- Appropriate spill prevention and countermeasure controls should be implemented to prevent or control potential leaks or spills. Consequently, secondary containment is recommended for all ASTs, 55-gallon drums and other containers utilized to hold motor oil, used oil or other possible spent products.
- If future construction or redevelopment activities at the Property encounter environmental impairment in the subsurface soil or groundwater, then an additional environmental investigation may need to be conducted.

It is the opinion of IWM Consulting's Environmental Professional that this environmental site assessment has identified conditions indicative of releases or threatened releases of hazardous substances at the Property from possible off-site sources and further investigation may be warranted.

11.0 REDEVELOPMENT INCENTIVES

IWM Consulting had identified possible redevelopment incentives that may potentially be utilized during future development at the property. The following is a list of program incentives by agency:

Indiana Economic Development Corporation:

- Shovel Ready Program - This program plays a vital role in state economic development by assisting companies and communities identify sites that can be rapidly developed. All minimum standards needed to apply into this program appear to have been achieved.
- 21st Century Research and Technology Fund – The fund stimulates the process of diversifying the state's economy by developing and commercializing advanced technologies in Indiana, and it emphasizes the creation of academic-sector/commercial-sector partnerships.
- Certified Technology Park Program – Program is designed to support and attract growth of high-technology businesses in Indiana and promote technology transfer opportunities.
- Economic Development for a Growing Economy Tax Credit (EDGE) – This program rewards companies that create new jobs and contribute to the growth of Hoosier income.
- Hoosier Business Investment Tax Credit (HBITC) – This program provides a credit against a company's Indiana tax liability to encourage capital investment in Indiana.
- Industrial Development Grant Fund (IDGF) – This grant fund provides financial support for infrastructure improvements in conjunction with projects creating jobs and generating capital investment in Indiana.
- Industrial Recovery Tax Credit (Dinosaur Building) – This tax credit provides an incentive for companies to invest in facilities requiring significant rehabilitation or remodeling expense.
- SBIR/STTR Matching Program – This fund provides matching grants (up to a maximum amount of \$100K) to recipients of Phase I awards from the Small Business Innovation and Research (SBIR) and Small Business Technology Transfer (STTR) programs.
- Skills Enhancement Fund (SEF) – The SEF program provides reimbursement for training expenses to encourage companies to invest in their existing workforce and train new employees.
- Venture Capital Investment Tax Credit – This program assists Indiana companies in raising capital by offering a tax incentive to individual and corporate investors.

Indiana Finance Authority, Indiana Brownfields Program:

The mission of this program is to encourage and assist investment in the redevelopment of Brownfield properties by helping communities via technical and financial assistance to identify and mitigate environmental barriers that impede local economic growth. The Indiana Brownfields Program offers financial assistance in the forms of grants and low-interest loans for site assessment, remediation, and demolition. The State also

matches grants for recipients of U.S. EPA Brownfields funding and offers tax incentives for voluntary remediation activities at qualified Brownfield sites. Available sources of financial assistance include the following:

- Stipulated Site Assessment Grants
- Stipulated Remediation Grants
- Petroleum Remediation Grants
- Federal Matching Grants
- Brownfield Low-Interest Loans
- Voluntary Remediation Tax Credits

Federal Grants and Assistance:

Cities and towns have used several federal programs to help finance some aspect of Brownfield reuse – basic site preparation, planning, site assessment, cleanup, and construction. Only three of these programs explicitly focus on Brownfields: the U.S. Environmental Protection Agency (EPA) assessment and cleanup programs, and the U.S. Department of Housing and Urban Development (HUD) Brownfield economic development initiative (known as BEDI), which mainly applies to block-grant entitlement cities. A list of pertinent federal programs is provided below.

- U.S. EPA Programs – Three EPA financing programs have been used exclusively to spur Brownfield redevelopment, and a fourth has shown promise in several states. The available programs are as follows:
 - 1) Site Assessment Grants
 - 2) Site Cleanup Grants
 - 3) The Brownfield Cleanup Revolving Loan Fund
 - 4) Clean Water State Revolving Loan Funds
- U.S. HUD Programs – HUD programs offer communities the most resources for Brownfield projects and the greatest flexibility in carrying them out. The available programs are as follows:
 - 1) Community Development Block Grants (CDBG)
 - 2) Section 108 Loan Guarantee Program
 - 3) HOME Investment Partnerships Program
 - 4) Brownfields Economic Development Initiative (BEDI)
 - 5) Renewal Community/Empowerment Zone/Enterprise Community (RC/EZ/EC) Initiative
 - 6) Economic Development Initiative (EDI)
- U.S. Economic Development Administration (EDA) Programs – The EDA has emerged as one of the EPA's strongest interagency partners. EDA funding can cover the costs of addressing various kinds of contamination, including leaking underground tanks, asbestos, PCBs, and lead paint, which can make it more flexible than other federal programs. Many communities may not be eligible for EDA funds due to eligibility criteria which is linked to unemployment rates.
- U.S. Army Corps of Engineers Program – If a Brownfield can be tied to water or water quality, it may be eligible for support from the U.S. Army Corps of Engineers.

- U.S. Department of Transportation (DOT) Program – Some communities have made creative use of federal DOT funds for Brownfield purposes, linking transportation projects with Brownfield projects in the following ways. The Brownfield site itself may be a transportation facility (i.e. road, port or rail yard) in need of upgrading. In other cases, transportation system improvements are needed to make the Brownfield site more marketable; such as expanding access that better connects vehicles or rail with people and sites. An additional use consists of using the transportation upgrade as part of the pollution solution, using roads, parking lots, and other transportation structures as caps to safely limit exposure and make site development costs more manageable.

Federal Tax Programs – The federal tax code provides a unique tool, the Brownfield tax expensing incentive. It enables taxpayers to deduct environmental cleanup costs in the year they occur them, rather than having to capitalize them over time. In addition, for revitalization strategies that include affordable housing, Brownfield projects can be linked with low-income housing tax credits.

13.0 ADDITIONAL SERVICES

No additional services were performed as part of this Phase I ESA for the Property.

14.0 PROFESSIONAL STATEMENT

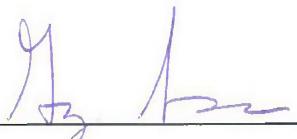

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40CFR 312. We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Copies of the environmental qualifications of the Environmental Professionals are included in Appendix I.

USER PROVIDED INFORMATION

APPENDIX D

 E 1527 - 05

Widewater Industrial Drive Commercial Businesses
Lafayette, IN 47904

X3. USER QUESTIONNAIRE

INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)*¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

- 1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state, or local law?

No

- 2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No

- 3) Specialized knowledge or experience of the person seeking to qualify the LLP (40 CFR 312.28).

As the *user* of this ESA, do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

¹ *Landowner Liability Protections, or LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide)* issued on March 6, 2003.

X3. USER QUESTIONNAIRE

- 4) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Not Applicable

- 5) Commonly known or reasonably ascertainable information about the *property* (40 CFR 312.30).

- a) Do you know the past uses of the *property*?

No

- b) Do you know of specific chemicals that are present or were once present at the *property*?

No

- c) Do you know of spills or other chemical releases that have taken place at the *property*?

No

- d) Do you know of any environmental cleanups that have taken place at the *property*?

No

OCT-31-2007 04:44

LAFAYETTE CHAMBER

765 742 6276 P.04

 E 1527 - 05**X3. USER QUESTIONNAIRE**

- 6) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the *user* of this *ESA*, based on your knowledge and experience related to the *property*, are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?

No

X3.1 USER QUESTIONNAIRE

In addition, certain information should be collected, if available, and provided to the *environmental professional* selected to conduct the Phase I. This information is intended to assist the *environmental professional* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

- a) the reason why the Phase I is required,

Our community is performing an evaluation of redevelopment options for property along the river corridor. Current *ESA*'s are essential to this review.

- b) the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,

Purchase

- c) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful),

Maps have been provided

- d) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

The requirements are specified in our contract with our consultants.

- e) identification of all parties who will rely on the Phase I *report*,

Property owner, Tippecanoe County and/or its agents

- f) identification of the site contact and how the contact can be reached,

Robert Smith 765-5081

OCT-31-2007 04:44

LAFAYETTE CHAMBER

765 742 6276 P.05

 E 1527 - 05**X3. USER QUESTIONNAIRE**

- g) any special terms and conditions which must be agreed upon by the *environmental professional*, and

Specifics are contained in the contract with the professional

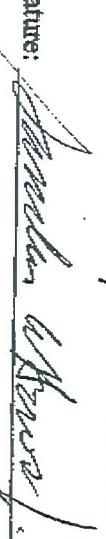

- h) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

None known to me.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/27/2006 has revealed that there is 1 NPL site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
TIPPECANOE SANITARY LANDFILL, OLD MONON RAIL REBUILDING SHOP	2801 NORTH 9TH RD, 1/2 1750 MONON AVENUE	0-4,5,7,8 8-7

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 11/28/2006 has revealed that there are 2 CERCLIS sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
TIPPECANOE SANITARY LANDFILL, OLD MONON RAIL REBUILDING SHOP	2801 NORTH 9TH RD, 1/2 1750 MONON AVENUE	0-4,5,7,8 8-7

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/10/2006 has revealed that there are

EXECUTIVE SUMMARY

9 CERC-NFRAP sites within the searched area.

Site	Address	Map ID

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/27/2006 has revealed that there are 3 CORRACTS sites within the searched area.

Site	Address	Map ID

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/13/2006 has revealed that there are 3 RCRA-TSDF sites within the searched area.

EXECUTIVE SUMMARY

STATE AND LOCAL RECORDS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Management's List of Hazardous Waste Response Sites Scored Using the Indiana Scoring Model.

A review of the SHWS list, as provided by EDR, and dated 04/21/2006 has revealed that there are 2 SHWS sites within the searched area.

TRW COMMERCIAL STEERING DIV INDIANA GAS COMPANY	800 HEATH ST 600 N 4TH STREET	11-15 17-15

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Management's list: Permitted Solid Waste Facilities/Landfills Closed Prior to December 5, 1991.

A review of the SWF/LF list, as provided by EDR, and dated 01/04/2007 has revealed that there is 1 SWF/LF site within the searched area.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 Manufactured Gas Plants sites within the searched area.

TIPPECANOE SANITARY LANDFILL, INC. (Continued)

landfill was operated at the Site until it was closed in October 1989 pursuant to a Consent Decree from an Indiana state court. During the years that the landfill was operated, there were several periods when the landfill did not have an operating permit from the state. During these periods, the landfill generally continued to operate while the landfill operator appealed the state's permit decisions in Indiana state courts. Some of the claims against the landfill operator were that there was only sporadic daily cover, unsatisfactory daily cover, possible acceptance of hazardous waste, poor geologic conditions, and failures to operate in accordance with the requirements of the permit. Primarily, the wastes disposed of at the Site were the solid wastes generated by local residents, businesses, and industries. An industrial sludge went to the Site for a number of years in the 1970s, and this practice was discontinued when a sludge sample was found to contain elevated levels of polychlorinated biphenyls (PCBs). During the last year or more of operation, some out-of-state wastes were accepted at the Site. The landfill closed before the anticipated final elevations were reached. An acceptable final cover was never completely and properly installed over the landfill after the landfill stopped accepting wastes. On March 8, 1990, the USEPA, the Indiana Department of Environmental Management (IDEM), and ten of the parties who had been named potentially responsible parties (PRPs) for the Site agreed to an Administrative Order on Consent that required these PRPs to conduct a remedial investigation (RI) and feasibility study (FS) for the Site. More parties were named PRPs in 1992, and nine additional PRPs joined the original group. The Site was finalized on the National Priorities List (NPL) on August 30, 1990. The RI/FS was completed in July 1997 with the Record of Decision being signed on September 30, 1997, by the U. S. EPA, upon which, the State gave its concurrence. A ROD addressing OU1 was completed in July 1997. On March 31, 1998, the Indiana Department of Environmental Management (IDEM) signed a Consent Decree with the property Owner Defendants and the Settling Defendant for the implementation of the remedial design (RD) and remedial action (RA) for the site. The Consent Decree was entered in U. S. District Court in Indianapolis on August 10, 1998. On April 16, 1999, IDEM approved the Remedial Design Work Plan (RDWP) for the site. On April 10, 2000, IDEM granted the PRPs permission to initiate preliminary construction activities necessary to prepare the site for RA commencement. On June 22, 2000, IDEM gave conditional approval of the RD, excluding the Leachate Extraction System and the Operation & Maintenance Plan. These portions were excluded pending the resolution of a dispute for disposal of the leachate generated at the landfill at the local POTW as presented in the RD selected remedy. During the selected remedy construction, it was discovered that landfill wastes extended to the edge or very near the edge of the property boundary for the landfill. Since waste relocation was excluded as an option in the RD and, even if it were not excluded, the volume of waste that would need to be relocated was extremely large, the next best option was for the PRPs to purchase additional land along the property boundaries involving the waste encroachment. Therefore, additional land was purchased along the northern, eastern, and southern property boundaries. The additional property purchased varied from 50 foot to 150 foot wide strips of land. An ESD addressing OU1 was completed in September 2001.

Other Pertinent Environmental Activity Identified at Site

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (IDEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA programs. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node

Summary Details:			
<p>Conditions at proposal June 24, 1988): Tippecanoe Sanitary Landfill, Inc. (TSL) operates a 51-acre landfill in Lafayette, Tippecanoe County, Indiana. In 1971, the company received a permit from the State to accept municipal waste. Operation dumping had occurred for an unknown period prior to that date. In 1978, the State did not renew the site's operating permit because of shallow ground water and highly permeable subsurface materials at the site. A series of appeals followed, and the facility is currently operating without a permit. In 1979, ALCOA, Lafayette, Indiana, advised the State that its aluminum-line sludge, which had been hauled to the site since 1973, had been found to contain significant levels of PCBs. Disposal of the sludge ceased, but considerable quantities had already been deposited at the site. In December 1983, the Indiana State Board of Health found that a nearby well contained PCBs and acetone, as well as lead and cadmium, at levels exceeding Federal primary drinking water standards. An estimated 81,000 people obtain drinking water from public and private wells within 3 miles of the site. In May 1987, the Indiana Department of Environmental Management (IDEM) started litigation to permanently enjoin TSL from operating. Status August 30, 1990): A Consent Decree with IDEM dated November 29, 1988, required TSL to stop accepting solid wastes by October 1, 1989, remove all personnel and equipment by October 31, 1989, and place a cover of soil on filled areas. TSL filed a bankruptcy petition in February 1989. The landfill closed in September 1989. A TSL contractor started to cap the filled areas, but the capping is not yet complete. EPA issued special notice letters to 17 parties potentially responsible for wastes associated with the site, offering them the opportunity to conduct a remedial investigation/feasibility study (RI/FS) to determine the</p>

Other Pertinent Environmental Activity Identified at Site

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (IDEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo Corrective Action Summary:
CA Prioritization, Facility or area was assigned a medium corrective action priority.
 Event: 09/27/1991
 Event: RFA Completed
 Event Date: 03/31/1987

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (IDEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The shops served as the primary repair and maintenance facility for the engines and cars utilizing the Hoosier Line. In addition to upkeep and repair, the shops built steam engines in the early 20th century. In March 1948, CSX Transport purchased the shop area and through the next two decades used it to build an</p>

Mr. Donovan Thomas Wilczynski
Field Geologist
Industrial Waste Management Consulting Group, LLC
7428 Rockville Road
Indianapolis, Indiana 46214-3070

RE: Wellhead Protection Area Proximity Determination
607/609/610/614/703/706/707/711/715/721A/721B/
801 (As well as the gravel lot to the east of 801)
Widewater Drive
Lafayette, Indiana 47904

Upon review of the above referenced site, it has been determined that the site **is located** within a Wellhead Protection Area.

This information is accurate to the best of our knowledge. However, there are in some cases, a few factors that could impact the accuracy of this determination. For example, some Wellhead Protection Area Delineations have not been submitted or may not have been approved by this office. In these cases, we use a 3,000 foot fixed radius buffer to make the proximity determination. To find the status of a Public Water Supply System's Wellhead Protection Area Delineation, please visit our tracking database at http://www.in.gov/serv/idem_groundwater.

If you have any additional questions, please feel free to contact me at the address above or at (317) 308-3388.

Sincerely,

James Sullivan, Chief
Ground Water Section
Drinking Water Branch
Office of Water Quality

Record of Verbal Communication/ Phone Log

Date: 9/27/2007 Time: 9:23 AM IWM Contact Name: Donovan Wilczynski

Project Name: Widewater Industrial Park

Person Contacted: Ron R. Noles

Phone#: (765) 423-9221

Company Name: Tippecanoe County Health Department

Summary:

According to Mr. Noles, no known adverse environmental concerns have been reported at the Property. The only information he has for the widewater area is on the historical dump across 9th street to the east.

Follow-up Action:

None.

IWM Consulting Group, LLC

Record of Verbal Communication/ Phone Log

Date: 9/21/07 Time: 9:30 AM IWM Contact Name: Patrick Rohan

Project Name: Widwater Industrial Park

Person Contacted: Mr. Bob Smith Phone#: (765) 742-5081

Company: Magic Glass Inc. (Property Owner)

Summary:

IWM Consulting interviewed Mr. Bob Smith at the Property prior to initiating the site visit. According to Mr. Smith, the building was constructed in the 1980's or 1990's. Prior to that time period, the Property was unused vacant land. He is not aware of any USTs, chemical or petroleum spills or water wells at the Property. Additionally, he is not aware of any additional indicators that point to the presence or likely presence of contamination at the Property based on personal knowledge or experience.

Follow-up Action:

None.

Time: 12:30 PM

IWM Contact Name:

Patrick Rohan

Project Name: Widewater Industrial Park

Person Contacted: Mr. John Mallady-Site Owner/Manager

Phone#: (765) 423-1618

Company Name: Tire Specialty Safety Center/BF Goodrich Automotive

Summary: According to Mr. Mallady, the facility has been in operation for approximately

15 years. The southeast portion of the building is a private garage used for storing vehicles. The west portion of the building is a storage garage for restored vehicles and obsolete tires that are no longer manufactured or sold. The site does not use USTs; however, ASTs are used in the oil room west of the garage work bays. No drains are located within the garage work bays; however, drains are located outside the building to the east. The drains empty in the City of Lafayette maintained concrete two-stage oil/water separator. The water is discharged into the sanitary sewer system. No sediment or sludges have been removed from the separator by the City of Lafayette to the best of his knowledge and no violations have been incurred from the City of Lafayette. The used oil generated from oil changes and the petroleum parts washer is stored in a 225-gallon metal aboveground tote. The used oil in the metal tote is removed on an as needed basis by a private contractor who reuses the oil heating other facilities/barns. The two flush-mounted wells located in his asphalt covered parking lot are associated with the former Mechanic's Laundry facility.

Follow-up Action:

None.

IWWM CONSULTING PERSONNEL QUALIFICATIONS

IWM CONSULTING

PATRICK E. ROHAN, CHMM

PROJECT MANAGER

Professional Qualifications:

Mr. Rohan is Project Manager for IWM Consulting Group, LLC (formerly Handex), located in Indianapolis, Indiana. Mr. Rohan has 12 years of professional experience and is a qualified All Appropriate Inquiry (AAI) Environmental Professional. His responsibilities include preparation of technical reports (CAPs, Phase I and Phase II Site Assessments, UST Investigations, Brownfield programs and VRP investigations) and project oversight of several site characterization studies. Additional responsibilities include advocacy activities with state regulatory agencies regarding site reviews and closure.

Currently, Mr. Rohan works with City and County Economic Development Commissions to develop and write grants for potential Brownfields Stipulated Assessment Grant Incentive (SAGI) and Petroleum Remediation Grant Incentive (PRGI) site locations. Additionally, Mr. Rohan has managed four IDEM State Cleanup Division/IFA sponsored brownfield site locations one of which was a Petroleum Remediation Grant Incentive (PRGI) facility.

B.A. Biology/Business Management, Indiana University, 1989

M.S. Environmental Science, Indiana University, 1994

Certified Hazardous Materials Manager-Institute of Hazardous Materials Management
29 CFR 1910.120 40-OSHA Health and Safety Training
Indiana Asbestos Building Inspector License No. 191718081
Illinois Asbestos Professional License No. 100-10883

• Phase I ESA Area Survey

Mr. Rohan acted as the Environmental Professional for these projects and participated in all aspects of the data evaluation, field activities and report preparation. The purpose of the Area Surveys was to identify Brownfield Sites and Active Potential Sites of Concern.

City of Indianapolis: IWM Consulting completed a Phase I ESA Area Survey encompassing a 520 square acre area, which included over 1,800 parcels. This information was gathered within a 30-day time period and presented to the City of Indianapolis. IWM Consulting, in conjunction with the City of Indianapolis, developed a Final Priority Site List and subsequently completed 20 AAI-compliant Phase I ESA reports. The funding for this Area Survey was provided by an USEPA Brownfield Grant.

Greater Lafayette Community Development Corporation: IWM Consulting completed a Phase I ESA Area Survey of properties within the Wabash River Corridor. The area encompasses approximately 2,000 acres and incorporates approximately 260 individual land parcels. This information was gathered within a 45-day time period and presented to the GLCDC. The funding for this Area Survey was provided by an USEPA Brownfield Grant.

• Phase I Environmental Site Assessments

Mr. Rohan has investigated over 300 sites within the Midwest and Florida. Assessments were conducted at various residential or commercial/industrial facilities for due diligence purposes. Phase I Assessments included review of all applicable regulatory databases including but not limited to aerial photographs, land title records, topographic maps, city/county directories, zoning/land use records, Sanborn maps, wetland maps, wellhead protection inquiries, and other pertinent records as needed. Completed over 30 Indiana Responsible Property Transfer Law Environmental Disclosure forms for Amoco Oil Company. Conducted and supervised 23 expedited Phase I ESA Transaction Screens in accordance with ASTM 1528-00.

IWM CONSULTING

PATRICK E. ROHAN, CHMM

PROJECT MANAGER

- **Phase II Site Investigations**

Conducted over 75 Phase II Site Investigations at various commercial/industrial facilities throughout the Midwest region which included on-site supervision and report preparation duties. Phase II Site Investigation activities included all aspects of site coordination/scheduling, soil boring/monitoring well installation, soil/groundwater collection and submittal, and report preparation including remediation strategies.

- **Leaking Underground Storage Tank Responsibilities**

Managed all site coordination/scheduling activities, initial site investigation work, soil boring/monitoring well installation, quarterly groundwater sampling events, remediation system operation and maintenance, soil excavation activities, in-situ bioremediation activities, and all reporting requirements for more than 25 sites.

- **Hazardous Waste Landfill Closure**

Managed a site investigation, closure sampling program and final RCRA closure reporting of a hazardous waste landfill in Fort Wayne, Indiana. Grid sampling conducted throughout service roads/staging areas for heavy metals and other necessary constituents.

- **Voluntary Remediation Program**

Completed Remediation Work Plan for a former service station in Evansville, Indiana regarding petroleum impacted soil. Completed Remediation Work Plan for a dry cleaner facility in Indianapolis, Indiana with volatile organics in soil and groundwater (PCE and constituents). Currently, working on attaining Covenant Not To Sue and Certificate of Completion from the Governor's Office and IDEM for the dry cleaner VRP facility in Indianapolis, IN.

- **Industrial Hygiene/Asbestos Surveys**

Conducted and managed over 50 asbestos surveys at retail service stations, multi-residential units and various commercial facilities. Supervised asbestos inspection at GE facility in Bloomington, Indiana. Conduct noise testing services and personnel air monitoring at industrial facilities.

- **SPCC Plan Management**

Conducted and supervised over 20 SPCC Plan modifications for a major oil company in Ohio, New York, Pennsylvania, Kentucky, West Virginia and Indiana.

- **Excess Liability Trust Fund (ELTF)**

Mr. Rohan has managed the Excess Liability Trust Fund (ELTF) reimbursement program for a major oil company (over 120 major oil service stations) in the state of Indiana, which has returned in excess of five million dollars to the client. Additionally, Mr. Rohan interacts and negotiates directly with the appropriate regulatory agencies to assist in the timely payment of ELTF claims.

IWM CONSULTING

GREG SCARPONE, LPC

DIRECTOR OF ENVIRONMENTAL SERVICES

Professional Qualifications:

Mr. Scarpone is the Director of Environmental Services for IWM Consulting located in Indianapolis, Indiana. Mr. Scarpone has over eighteen years of professional experience in environmental consulting. His experience includes the regional management five environmental offices, supervision of numerous subsurface investigations, remediation design, remediation system installation and operations and maintenance. He has a working knowledge of the unconsolidated and bedrock geology of Indiana, specializing in subsurface mapping.

Education:

Master of Science, Geology, Ball State University, 1997
B.S., Earth Sciences, University of Indianapolis, 1984
29 CFR 1910.120 40 Hour OSHA Health and Safety Training

Project Experience:

- Regional Project Management

Managed five offices performing work in seven Midwest States. Responsible for P & L, human resources, sales & marketing and technical aspects for the offices. The Midwest Region generated approximately \$20 Million in gross revenue over the last three years providing our clients with excellent service.

- Portfolio Project Management

Portfolio Management Team for a major oil company managing all environmental compliance issues in Indiana. This includes the project management of over 120 retail gasoline stations and three bulk terminals. The Portfolio management included the completion of multiple subsurface investigations, station upgrades and optimization of multiple remediation systems. Remediation technologies included groundwater pump and treat, air sparge and soil vapor extraction, bioventing, vacuum dewatering, and dual phase extraction.

- Phase I ESA Area Survey

IWM Consulting was retained by the City of Indianapolis to complete a Phase I ESA Area Survey over a 520 square acre area, which included over 1,800 parcels. The purpose of the Area Survey was to identify Brownfield sites and Active Potential Sites of Concern. This information was gathered within a 30-day time period and presented to the City of Indianapolis. The funding for this Area Survey was provided by an USEPA Brownfield Grant. Mr. Scarpone participated in the data evaluation and field activities.

- Environmental Construction Project Management

Project Manager of Superfund RRA in Indiana with a budget of 4 million dollars. The RRA included final design, earthwork, construction and operation of the largest soil vapor extraction system in Indiana.

- Brownfield Project Management – Vincennes, IN

Project Manager for SAGI Brownfield Grant. Assisted community in applying for and receiving grant money. Project involved Phase II assessment of a former bulk plant. Long term goals are to establish a historical city park on the property.

IWM CONSULTING

GREG SCARPONE, LPG

DIRECTOR OF ENVIRONMENTAL SERVICES

- **Bedrock Assessment Project**

Directed deep aquifer project for the Indiana Geological Survey. He utilized packers to sample discrete stratigraphic units at various depths. The pilot study was used to assist policy decision making regarding reinjection wells

- **Subsurface Stratigraphy Project**

Conducted baseline environmental study for major airline at proposed maintenance facility. The study defined and classified hydrostratigraphic units within glacial deposits beneath the site.

- **Brownfield Grants – Phase II Projects**

Managed several Brownfield Phase II investigations for various communities in Indiana. Assisted the communities in applying for and receiving grant money to fund the projects. Several sites have been redeveloped, adding jobs and tax revenues for the communities.

IWM CONSULTING

DONOVAN T. WILCZYNSKI
FIELD GEOLOGIST

Professional Qualifications:

Mr. Wilczynski is a Staff Geologist for IWM Consulting Group, LLC located in Indianapolis, Indiana. He has approximately 6 months of professional experience in the environmental consulting field. His experience includes collection of soil and groundwater samples during subsurface investigations, installation of soil borings and monitoring wells, and operation and maintenance duties on remediation systems. Responsibilities include data evaluation and preparation of Phase II environmental reports, and preparation of Phase I reports.

Education:

B.S. Geology with concentration in Environmental Geology, Ball State University
29 CFR 1910.120 40 Hour OSHA HAZWOPER trained

Recent Projects Completed:

- Major Oil Companies
 - Groundwater sampled at Petroleum Sites. Site assessments include sample collection, data reduction and report preparation. Tasks included groundwater sampling, soil sampling, health and safety, documentation, and Free Product Recovery. Mr. Wilczynski has performed groundwater sampling and operation and maintenance in the states of Indiana and Michigan.
- Operation and Maintenance
 - Performed operation and maintenance activities at various sites in Indiana.
- Phase I Environmental Site Assessments
 - Environmental assessments are geared toward future AAI or ASTM E1527-05 requirements. Mr. Wilczynski has investigated sites for the Irvington Development Organization. Assessments were conducted at various residential or commercial/industrial facilities for due diligence purposes. Phase I Assessments included review of all applicable regulatory databases including but not limited to aerial photographs, land title records, topographic maps, city/county directories, zoning/land use records, Sanborn maps, wetland maps, wellhead protection inquiries, and other pertinent records as needed.
- State Brownfield Projects
 - Mr. Wilczynski supervised UST removal, soil excavation, groundwater sampling, and soil boring/well installation activities.
